

Additional services at your fingertips. Our subscription-based service allows clients control over any queries they have

What is VATITadd?

VATITadd was developed due to demand from our clients for a quick point of reference to obtain assistance with various tax-related matters and technical inquiries.

Client queries are conveniently logged on a platform and actioned by us within 3 business days depending on the technical nature of the query. Our clients can also obtain all historic queries logged for future reference and extract reports.

VATITadd includes the following services:

- Assisting with Tax inquiries logged on the electronic platform and providing a written response to ensure correct tax treatment of transactions (summary of applicable legislation provided).
- Review of correspondence to revenue authorities to ensure that adequate and accurate information is provided.
- Other services which fall outside the scope of the VATITadd offering will be provided and quoted for on a discounted hourly rate.

It's a Package Deal!

Our Package allows clients access to our full range of features.

Once a client has paid the invoice and their contract is signed, they will have access to the features on the VATITadd system. The system is easy to use and navigate. Clients can navigate their client portal alone or ask for help. Our specialists are available weekdays to assist clients with any queries or questions.
