

## *The Tax Benefit Review*

The primary objective of the Tax Benefit Review (TBR) is to identify whether there are any opportunities to reduce the tax liabilities of your organization and optimize the efficiency with which tax is dealt with in your financial accounting system. This could take the form of increasing input tax deductions, decreasing output tax payments, and obtaining refunds of interest and penalties previously paid.

In addition, VAT IT will also identify opportunities within Customs and Excise which entails the classification of goods in the Harmonized System Customs Tariff Nomenclature, the basis upon which customs duty is calculated. The applicability of relief and customs duty management facilities such as preferred duty regimes, and the use of industrial and general rebate provisions and the like will also form part of the scope of the Agreement.

It is important to understand that there is no hourly fee payable for engaging in our TBR. You will only be billed at the time when you have received a refund from your suppliers or from the Tax Authority or if your periodic payment to the Tax Authority has been reduced as a result of the saving identified.

**IF WE DO NOT SAVE YOUR ORGANISATION MONEY WITH THE TBR,  
WE DO NOT CHARGE ANY FEES.**
